

# The Chat

Number 408  
September, 2014

A voice for education and conservation in the natural world

Rogue Valley Audubon Society

[www.roguevalleyaudubon.org](http://www.roguevalleyaudubon.org)

Deadline for submissions for the October 2014 issue is Sept. 20.

## SEPTEMBER PROGRAM MEETING, TUESDAY, SEPT. 23 at 7 PM.

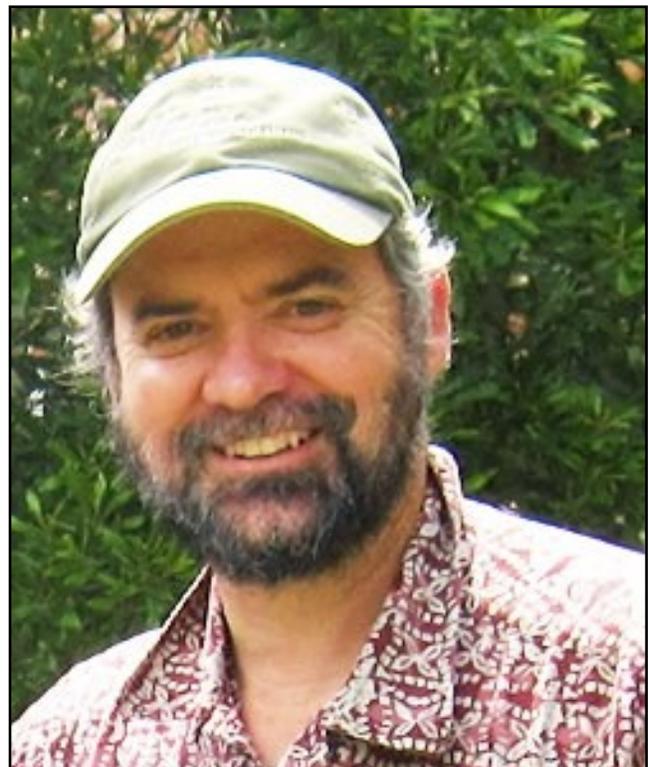

### THE MIDDLE OF EVERY- WHERE - Presented by Pepper Trail

The Bear Creek Valley, tucked into a fold between the Cascade and Siskiyou Mountains, may seem to be in the middle of nowhere. But here, in a single day, you can walk through sagebrush and spruce forest, spot Great Gray Owls and Blue-gray Gnatcatchers, Chestnut-backed Chickadees and American White Pelicans. Our region is one of the great biological crossroads of North America, but what exactly is it that makes it so unique?

In this talk, ornithologist and naturalist Pepper Trail will tie together the geological, botanical, and zoological history of the Klamath-Siskiyou to give even lifelong residents a new appreciation of the biological wealth of the place we're

lucky enough to call home.

Join Pepper for what is sure to be an informative, interesting and entertaining presentation.

Chapter Program meetings are held at 1801 E. Jackson St., Medford, in Lidgate Hall of the Medford Congregational Church.

## OFFICERS and DIRECTORS

**President:** Linda Kreisman, 541-482-6456,  
[linda@ashlandhome.net](mailto:linda@ashlandhome.net)

**Vice-President:** Mike Guest, 541-857-6334,  
[mwguest@juno.com](mailto:mwguest@juno.com)

**Treasurer:** Sue Polich, 541-608-3802,  
[spolich@charter.net](mailto:spolich@charter.net)

**Secretary:** Anne Goff, 541-899-1036  
[annegoffar@charter.net](mailto:annegoffar@charter.net)

Jon Deason	<a href="mailto:jdeason39@gmail.com">jdeason39@gmail.com</a>
Joanne Haddad	<a href="mailto:joannehad@aol.com">joannehad@aol.com</a>
Carol Palmer	<a href="mailto:carol_p@charter.net">carol_p@charter.net</a>
Katy Reed	<a href="mailto:wbumedford@qwestoffice.net">wbumedford@qwestoffice.net</a>

## COMMITTEE CHAIRS

**Archivist:** Gwyneth Ragosine, [gwynethr@mind.net](mailto:gwynethr@mind.net)

**Annual Picnic:** Gaylene & Judd Hurley, 541-621-3196

**Birdathon:** vacant

**Book Sales:** Sooney Viani, 541-482-5146

**Chat Editor:** Kaethe Fulton, [chateditor@gmail.com](mailto:chateditor@gmail.com)

**CBC-Ashland:** Harry Fuller, [anzatowhee@yahoo.com](mailto:anzatowhee@yahoo.com)  
& John Bullock, [jas@opendoor.com](mailto:jas@opendoor.com)

**CBC-Medford:** Bob Hunter, 541-826-5569

**Conservation:** Pepper Trail, [ptrail@ashlandnet.net](mailto:ptrail@ashlandnet.net) &  
Carol Palmer, [carol\\_p@charter.net](mailto:carol_p@charter.net)

**Education:** Lynn Kellogg, [rvas.ed@gmail.com](mailto:rvas.ed@gmail.com) &  
Sooney Viani [sooneyviani@gmail.com](mailto:sooneyviani@gmail.com)

**Field Notes:** Stewart Janes, 541-772-4595

**Field Trips:** Russ Namitz 541-294-2063,  
[namitzr@hotmail.com](mailto:namitzr@hotmail.com)

**Holiday Party :** vacant

**Hospitality:** Katy Reed, 541-245-5095

**Master Gardner Fair:** vacant

**Membership:** Gary Palmer; 541-245-9815,  
[fgpalmer@charter.net](mailto:fgpalmer@charter.net)

**Programs:** vacant

**Publicity:** Joanne Haddad, [joannehad@aol.com](mailto:joannehad@aol.com)

## CHAPTER COMMUNICATIONS

**E-mail Address:** [roguevalleyaudubon@gmail.com](mailto:roguevalleyaudubon@gmail.com)

**The Chat:** [chateditor@gmail.com](mailto:chateditor@gmail.com)

**Webmaster:** Jeff Tufts, [tallahto@aol.com](mailto:tallahto@aol.com);

**Web Site:** [www.roguevalleyaudubon.org](http://www.roguevalleyaudubon.org)

## President's Column

With the election of a new President, Vice-President, Secretary and Treasurer of the RVAS Board of Directors, several former Board members have taken on new roles including Sooney Viani as a co-chair of the Education Committee with on-going Chair Lynn Kellogg, Russ Namitz is coordinating field trips, and Carol Palmer is a Conservation Committee co-chair and representative to the Board. In addition, Cathie Izor is sending out new member letters every month and several members have volunteered to water our young trees at Denman during this drought year.

But, there are still some roles available, including:

- Birdathon Coordinator. A fun job, coordinating a major RVAS fundraiser while connecting with some of our best birders;
- Assisting in the set up of refreshments at Chapter meetings;
- Assisting the Treasurer by writing Thank you notes to donors;
- Holiday Party organizer (we are planning a simpler event than in years past); and,
- Program Chair. This summer both Pepper Trail and Jon Deason have graciously helped to put this year's programs together and Alex Maksymowicz has provided key assistance.

And please be assured, we welcome more help .

President's Column continued on Page 5

## Field Notes: The Changing Seasons Edited by Stewart Janes

A hot dry summer followed a dry winter and spring. Reservoirs started low and sank fast. This would not appear to be a recipe for great birding. Singing of several species shut down weeks earlier than normal including **Lazuli Buntings**, **Hermit Warblers**, and even **American Robins**. Several species took off early for more amenable climates. A few **Western Kingbirds** remain but numbers dropped sharply in late July two weeks earlier than normal. **Ash-throated Flycatchers** took off about the same time. The first **Black-throated Gray Warbler** appeared in my yard in the first week of July.

Having acknowledged that this year has been unusual and not particularly hospitable to birds, the birding this summer was pretty good. A **Gray Catbird** showed up at North Mountain Park in Ashland on 6/26 (BQ). This eastern species just makes it into the state as a breeding species in the Willows. There are very few records for our area.

The sighting that really interests me were the 11 **Pine Grosbeaks** observed at close range in the Sky Lakes Wilderness Area on 8/19 (BV,ML). Again, the closest breeding population is in the Willows, and that population is tiny. There is another small population in the Sierra Nevada of California. They are not known from elsewhere in the Oregon Cascades and are rare in the Washington Cascades. Are these wanderers or is there a tiny resident population in the Oregon high country? They are quiet birds and easily overlooked.

As the breeding birds in forest and field fall silent, attention shifts to the lakes and shorelines and for good reason. The shorebird migration is heating up. The last spring

migrants heading north have barely cleared the state when the first fall migrants dropped in. How do they manage to raise any young? This year the first was a **Western Sandpiper** seen on 6/29 at the Kirtland Ponds (JT). By the second of July both variety and number had increased. A **Baird's Sandpiper**, 25 **Least Sandpipers**, a **Greater Yellowlegs**, and 11 **Wilson's Phalaropes** were at the Kirtland Ponds (JT,RN). Numbers swelled in early August with more than a 100 peeps reported on 8/3 and 8/17 at Agate Lake and Emigrant Lake, respectively (JT,FL). And we are just entering the peak of fall shorebird migration, the last week of August.

Some of the less common species have been seen on several occasions. **Solitary Sandpipers** were reported on 8/4, 8/9, 8/17 and 8/18 (RN,JT). **Baird's Sandpipers** were seen between 8/4 and 8/18 (RN,JT) in addition to the early July sighting. **Pectoral Sandpipers** were observed on 7/23, 7/28, and 8/18 (JT). **Short-billed Dowitchers**, typically a coastal species, were reported on 7/9 (NB) and on 8/13 (RN).

Single sightings of **Sanderling** on 8/9 (DA), **Semipalmated Sandpiper** on 8/4 (RN), 2 **Long-billed Curlew** on 8/4 (RN), and **Black-bellied Plover** on 8/5 (JT) were also reported. The usual **Long-billed Dowitchers** first appeared on 7/9 (JT), **Semipalmated Plovers** on 7/23 (JT), and **Red-necked Phalaropes** on 7/23 (JT) and will probably be with us through at least September.

The **Black-necked Stilts** at the Kirtland Ponds hatched young again this year, but the young disappeared before they were old enough to fly suggesting loss to predators. The water just didn't last long enough.

*Continued on Page 4*

*Field Notes continued from Page 3*

**White Pelicans** showed up in much greater numbers than usual and dropped in on some ponds that seldom see them. They were first reported from the valley floor with 29 at Agate Lake on 7/29 (JT). The peak was 60 individuals on 7/31 also at Agate Lake (JT), and lesser numbers are still with us as of 8/17 (JT). How bad is that drought over in Klamath County?

**Caspian Terns** showed up on 7/31 at Agate Lake (JT) and have hung around, and 3 **Eared Grebes** were present on 8/18 (JT). A **Clark's Grebe** was at Emigrant Lake on 6/25 (HF).

The single **Blue-winged Teal** present since early May at the Kirtland Ponds was seen between 7/4 and 7/18 along with a single **Northern Shoveler** (RN,FL,JT). **Cinnamon Teal** were apparent at Agate Lake between 7/9 and 8/17 (JT,RN). I find the 8/18 sighting of a **Green-winged Teal** (JT) unusual. They are not known as a breeder in Jackson County. Have we overlooked them?

Not every bird was on the beach. A **Ferruginous Hawk** was along Foothill Road on 6/28 (DK), and a **Prairie Falcon** was observed at Emigrant Lake on 7/11 (JT). The **Merlin** seen on 7/20 (JT) at Agate Lake was an extremely early migrant.

**Purple Martin** sightings continue to increase. They were seen at Keene Creek Reservoir on 6/29 (FE), 7 at the Kirtland Ponds on 7/8 (BH), and 3 at the Kirtland Ponds on 7/18 (RN).

**Great-tailed Grackles** continue their relentless push into Jackson County. One was observed at Applegate Lake on 7/16 (ND), and a parent feeding young was reported from Michael Road in Sam's Valley (MR). This is the first confirmed breeding in Jackson County.

**Brewer's Sparrows** bred successfully in at least three locations in the eastern Siskiyou again this summer (FL,FE).

**Black Swifts** were seen along on Hill Creek on 8/14 (FL). This species appears to migrate annually through Jackson County, but because the west coast numbers are small, they are seldom encountered. A **Three-toed Woodpecker** was seen at Crater Lake on 7/21 (HS). They are resident in the area but seldom seen. A **Black-chinned Hummingbird** was at the feeder of Bob Hunter in Eagle Point on 7/21. **Black-billed Magpies** continue at the end of Valley View Road in Ashland (ES). It's been several years since this colony was observed. And in another sign of fall, the first **Say's Phoebe** of the season was reported from Emigrant Lake on 8/15 (FL).

A final note. I have had the pleasure of writing the Field Notes for The Chat for more than 20 years. It has been most instructive making sense out of the diverse observations reported from across the county each month. However, this year I will be on sabbatical which will involve travel and work on several projects. Consequently, I will be stepping away from my role as Field Notes editor. In my absence Jeff Tufts will apply his considerable experience and writing skills to the task. Thank you Jeff.

Thanks to this month's contributors including Dick Ashford, Norm Barrett, Nona Donahue, Forrest English, Harry Fuller, Bob Hunter, Doug Kirkpatrick, Frank Lospalluto, Russ Namitz, Maggi Rackley, Howard Sands, Eric Setterberg, and Jeff Tufts. Deadline for contributions to the Field Notes in the next edition of The Chat is September 15.

**President's Column** - *continued from Page 2*

We have three new Board members: Carol Palmer, Jon Deason and Joanne Haddad, but lost four members, which leaves the Board one member short. Nine members are required in the most recent by-laws. To make the seven member Board legal, Mike Guest has revised the by-laws and the Board has agreed to reduce the required number to seven (see Member Notification below). And while a seven member Board of Directors may now be legal, it is not considered optimal. The Board can be as large as twelve and we welcome new Board members at any time to help decide organization policies and refine objectives.

This summer, in my effort to come up to speed with my new role, I have been greatly comforted and encouraged by the support shown by so many of you and by how many people are willing to do so much for RVAS. I look forward to working with all of you this year to continue our commitment to birding and conservation in the Rogue Valley;

Linda

**NOTIFICATION OF CHANGES TO BY-LAWS**

The May 2013 by-laws for RVAS required a minimum of nine Board members, and a majority of the Board to be present to approve any action by the Board. We have experienced extreme difficulty in attracting new Board members. Consequently we have revised the by-laws to require a minimum of seven.

**Article III: BOARD OF DIRECTORS**

Section 1. The Board of Directors shall consist of up to twelve Directors and no less than seven elected by the members for terms of three years, replacement Directors to be elected annually.

Two other changes to the by-laws concern clarification on the election of officers at the annual Retreat.

**Article VI: ELECTIONS**

Revised Section 1. The election of Directors shall take place at the Annual Meeting held in April and their terms of office will start at the opening of the Retreat meeting - see Section 3.

Revised Section 3. The Officers of the Society shall be elected by the Board of Directors from among its own members at a Retreat meeting held within eight weeks following the Annual Meeting. The retiring officers shall serve until the new Officers are elected. Only current Board members shall vote for new officers.

**Note.** We would greatly prefer to have our maximum of twelve Board members. Thus we request each of our readers to seriously consider becoming a Board member. The duties are not onerous; we meet monthly September thru May - missing December, and have a one day Retreat in June.

Mike Guest, for Board of Directors

## MEET TWO NEW BOARD MEMBERS

### Carol Palmer

Carol (with her husband Gary -the current RVAS Membership Chair) moved from Yreka to suburban Medford in 2001. As a new member to RVAS, Carol has helped out RVAS in several capacities. She was one of the volunteers in 2005 who cleaned up after Stella, the Peregrine Falcon who liked to dine on a ledge at the Medford Hotel, disturbing residents who did not care for the debris of feathers and pigeon parts raining down on their neighborhood but who were persuaded to coexist with Stella . She also served on the mailing committee in the days when "The Chat" had to be hand-addressed, and on the Holiday Potluck hospitality Committee (she likes to do the decorations). She currently sends out e-mail notifications of events to the 130+ members who have requested the service and serves as a Co-Chair of the Conservation Committee.

### Jon Deason

Jon Deason began his association with Audubon at the age of 9, when he became President of the local Junior Audubon Society in Carmichael, California.

Jon graduated from San Francisco State College with a degree in anthropology, financing his education by working as a lifeguard and as a bartender in what he calls "banjo bars". He served two years with the Peace Corps in Colombia (where he met his wife, Ginny, a fellow-worker) and paid no attention to the birds of the rain forest. Back in California he got a job as a Job Corps Administrator but relocated to the Rogue Valley when strict budget cuts in California affected his program. Here he became Director of the War on Poverty programs.

In 1973 he was elected a Commissioner of Jackson County and served two terms. One of his proudest achievements is the enactment of the Jackson County Comprehensive Plan which establishes rules and guidelines for land use. He was also active in the Greenway Project and in opposition to the Elk Creek Dam (which, he says, almost got him recalled).

Life-long interest in the outdoors and conservation has now taken him into peony growing on a choice piece of habitat West of Medford. And after all these years he has taken up birding again and has come back to Audubon.

## The Conservation Column

Contributions by Pepper Trail, Carol Palmer and Jeff Tufts

**Update on Ashland Pond and the Ashland Water Treatment Plan:** As many of you know, the city of Ashland's water treatment operations need to be brought into compliance with strict new Department of Environmental Quality (DEQ) requirements regarding temperature of treated wastewater. The treated wastewater is currently released into Ashland Creek just a hundred yards or so above its confluence with Bear Creek. This does not provide adequate mixing to cool the water in Ashland Creek, which is a salmonid fish-bearing stream.

The Ashland Public Works Department has been exploring options to address this problem for several years, and RVAS has been involved because of our concern for riparian habitat along Ashland Creek, Bear Creek, and at Ashland Pond. We attended two study sessions on the issue this summer. The city has identified constructed wetlands combined with relocation of the wastewater outfall into Bear Creek as the preferred alternative, and has contracted out engineering studies to examine the feasibility of specific proposals. It currently appears that Ashland Pond would not be drastically affected by these proposals, which should produce a net gain in riparian/wetland habitat in the areas surrounding the sewage treatment plant. The engineering studies should be finished in the fall, with a final proposal by the end of the year. We will continue to follow this issue, and will provide updates as more information becomes available.

--- Pepper Trail

**Purple Martin Project:** The RVAS Conservation Committee is currently considering a housing project for Purple Martins to encourage them to nest in our area. We are still researching several aspects of this undertaking. Denman Wildlife Area is one location that has been selected as it seems suitable. Approval from the DWA Manager, Clayton Barber, is pending. Kirtland Ponds area could be another possible site. Another decision will be type of housing: an array of manmade gourds, individual nest boxes, or group homes. Perhaps more than one style would be attractive to our target bird.

--- Carol Palmer

**Prescott Park Trail System:** The RVAS Conservation Committee continues to monitor the proposal to construct an extensive system of trails--including many devoted exclusively to mountain biking--in Prescott Park. The city-owned park, which is part of the area known locally as Roxy Ann, is a favored location for birding in Jackson County and offers habitats that are unique to the City of Medford.

No trail construction is scheduled to take place in 2014 with construction in 2015 probably dependent to some extent on the availability of supplemental funding from the Rogue Valley Mountain Biking Association.

--- Jeff Tufts

**TREASURER'S REPORT**  
Submitted by Kathy Simonsen  
2013-2014 Financial Summary

The total income of \$13,723 came from the following sources:

Sales of the Birds of Jackson County	\$50
Chat Advertising	\$400
Local Dues	\$1875
National Audubon Dues	\$1870
Birdathon 2013 (submitted after 7/1/13)	\$753
Birdathon 2014	\$4265
Donations	\$1820
Holiday Event	\$2590
Bob Black Fund donation	\$100

Total expenses of \$8705 were the following:

Administrative expenses	\$2137
Chapter meeting expenses	\$542
Printing and mailing The Chat	\$2816
Education	\$40
Feeder Watch (birdseed)	\$615
Fundraising expenses	\$109
Membership Letters	\$157
Donations or expenses that support the RVAS mission	\$2289

The last item — RVAS Mission support — includes publishing the book of articles by Otis Swisher, support for the KBO Mountain Bird Festival, Chapter membership at the Malheur Field Station, Chapter membership and support for the Oregon Conservation Network and for the Oregon Bird Records Committee. The surplus income will be rolled over to the budget for the 2014-15 year. It has been a privilege to serve as your treasurer for the last 4 years. -- Kathy Simonsen

***BIRDS OF JACKSON COUNTY, Fourth Edition***, is now available for sale (\$5.00) at local stores, by ordering directly from the Rogue Valley Audubon Society (P. O. Box 8597, Medford, OR 97501) and at RVAS chapter meetings beginning September 23.

This popular reference source features monthly abundance charts and distribution characteristics of all species seen in the last 25 years as well as pre-1989 historical records. Also in this booklet, updated since it was last published in 2009, is a county map with reference marks to detailed descriptions of forty-five Jackson County birding and hiking locations in the Rogue Valley, the Siskiyou and the Cascades.

Introductory notes written by Jackson County Checklist Committee chair Stewart Janes include discussion of changes in this fourth edition, a general description of Jackson County and its birdlife, and extensive comments on changes in local bird populations that have occurred in the last four decades.

### BIRDATHON FUNDRAISING REPORT

Birdathon is a fun competition to see which team sees the most birds in the specified 24-hour period. You have already received the species results of the 2014 Birdathon, and you can review them again on our website. But the Birdathon is also one of our major fundraisers and all teams are asked to enroll financial supporters. I would like to acknowledge the financial contributions for the various teams. Thank you to all the teams for participating. Kathy Simonsen, Treasurer

<b>Team</b>	<b>Money raised</b>	<b>Number of Supporters</b>	<b>Number of Species Seen</b>
Great Grays	\$2061.65	21	156
Old World Warblers	\$980.75	22	101
Falcons	\$535.12	6	151
Binosaurus	\$400.00	4	156
The Breakfast Club	\$72.00	1	72
Wandering Tattlers	\$40.50	2	102
No team Specified	\$175.00	4	
<b>Total</b>	<b>\$4265.02</b>	<b>60</b>	

### SISKIYOU FIELD INSTITUTE SCHOLARSHIP UPDATE

Last year, Rogue Valley Audubon generously donated \$500 in scholarship funds to be used for Jackson County educators' continuing science education at Siskiyou Field Institute. The chapter has heard from last year's scholarship recipients with reports published in *The Chat*.

We carried over a fund balance of \$300 into this field season. To date, a total of \$210 has been awarded to an SOU teaching assistant ("Birding and Marine Mammals at Sea"), an Ashland High School teacher ("Edible Plants") and a John Muir charter school teacher ("Wilderness First Aid"). You can look forward to reading about their class experiences.

Thank you, Rogue Valley Audubon Society, for helping us promote our natural science education programs with the scholarships and a link on your website. We truly appreciate your support.

Kathleen Pyle  
Adult Education Program and Marketing Coordinator  
Siskiyou Field Institute

## ROGUE VALLEY BIRDS MESSAGE BOARD

Rogue Valley Audubon manages a Google message board (known as Rogue Valley Birds) that gives local (and visiting) birders a chance to share bird sightings and related information with fellow birders.

### To access Rogue Valley Birds:

- Go to the RVAS website < [roguevalleyaudubon.org](http://roguevalleyaudubon.org) > and click on the Birder's Message Board button on the left of the home page.
- Then click on **Rogue Valley Birds**. Alternatively, do an internet search for Rogue Valley Birds Google Group. Either option will take you to the home page for the RV-Birds message board. You can read all posted messages (and access any attached photos) while on the Rogue Valley Birds Google Group page. Just click on the desired message.

### To post on the RV-Birds message board:

- First subscribe to the group by following the links on the Google page.
- Then click on the "New Topic" button.
- Fill in the subject line with the appropriate information (brevity is the soul of efficient communication....avoid UPPER CASE except in cases of extreme importance).
- Compose your message. Please include specific location information that pertains to your sighting. If you're reporting birds from your home, it's not necessary to include the exact address, but please describe the approximate area (e.g. Ashland above the boulevard, East Medford foothills).
- Don't forget to proofread your message and then sign your name.

When you're ready to post the message, just click the "Post" button. If you are not subscribed to the group, you can post by emailing your message to < [rv-birds@googlegroups.com](mailto:rv-birds@googlegroups.com) >. Your posting will be subject to a review by a moderator which may cause some delay before it appears on the board.

### If you are a RV-Birds subscriber and wish to receive emails containing all posted messages:

- Click on the "My Settings" icon in the upper right portion of the Google Group page.
- Click "Membership and Email Settings" to see a box that gives you email options. There is a pull-down menu that allows you to choose one of four options: 1) don't send email updates, 2) send daily summaries, 3) send combined updates, and 4) send an email for every new message. Option number three combines 25 messages which means that you will probably receive about one email per week. Options two and four are the most popular.

**ROGUE VALLEY BIRDS MESSAGE BOARD—continued**

Reviewing the Rogue Valley Birds Google Group page will give you a good idea of how many messages are posted each week. All birders are encouraged to post messages about notable sightings in the Rogue Valley and surrounding regions including the Cascade and Siskiyou mountains in southern Oregon. If you report your sightings to eBird, please consider also posting unusual sightings to RV-Birds as not all local birders utilize eBird. If you are uncertain about whether your sighting would be of interest to RV-Birds subscribers or have other questions about the message board, feel free to contact the RVAS webmaster at < [tallahto@aol.com](mailto:tallahto@aol.com) >.

**GREAT GRAY OWL PLATFORM PROGRAM - Harry Fuller**

RVAS is helping place nest platforms for Great Gray Owls (GGOs). Jackson County has 300-500 GGOs, mostly in the Cascades. A few are in the uplands along the Applegate River. These numbers are based on estimates from Steve Godwin, BLM's chief biologist in the county. For about two decades BLM field biologists in southwestern Oregon have searched for Great Gray Owls during an annual spring survey. Great Grays are in eastern Josephine County and Klamath County. The only confirmed GGO population in northern California is a small one north of Alturas in Modoc County. In addition, there's an isolated population around Yosemite. Godwin assured me the recent forest fire east of Greensprings did NOT hit known GGO nesting habitat but burned mostly commercial timber land, not the right habitat for the GGOs.

Platforms are being made by volunteer and nature photographer, Peter Thiemann. Each needs to be carefully placed in dense, mature forest near meadows good for Great Gray hunting. A platform is put 35 feet above the ground by an experienced forestry worker. Donations collected go for materials and to pay the person equipped to hang the platform.

One limitation to Great Grays' population is a lack of nesting places. They don't build their own nests. Great Grays need a large tree trunk broken off at the right height or a nest built by Ravens or Red-tailed Hawks. Many of these natural nest sites are short-lived. A pair we monitored this spring on a private ranch near Grizzly Peak used a fast disintegrating Ravens' nest. That area is where the first two platforms have been placed this fall.

If you can donate to the Great Gray Owl nest platform fund, please send check to RVAS, P.O. Box 8597, Medford OR 97501. Your donations are tax deductible.

## RVAS BIRDING FIELD TRIPS AND WALKS

### Mountain Lakes Birding -- Sat. Sept. 13

Join leader Ron Ketchum and RVAS members for this trip to the mountain lakes of the nearby Cascades. Likely stopping places include Howard Prairie Lake, Hyatt Lake, Lily Glen Campground and Little Hyatt Lake. Late migrant warblers, early waterfowl and such mountain specialties as Mountain Quail and Mountain Bluebird are among the target birds.

Meet at the west end of the Shop N' Kart parking lot in Ashland at 7:30 a.m. to arrange carpooling. Most birding will be by driving to points of interest and stopping to observe. No significant hiking involved. Bring binoculars, field guides, hats, sunscreen, and refreshments. Dress for weather and wear appropriate footwear. No dogs please. Contact Ron at [rketchum@charter.net](mailto:rketchum@charter.net) for additional information.

### Birding at Emigrant Lake - Sun. Oct. 12

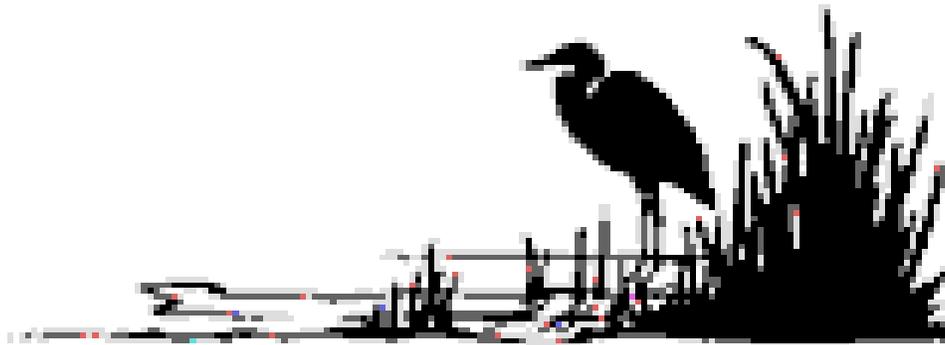

Harry Fuller will lead this birding trip. Exact date and other details to be announced. Check the field trip page at [roguevalleyaudubon.org](http://roguevalleyaudubon.org).

### Birding at Lost Creek Lake and Holy Waters - Sat. Nov. 8

Russ Namitz is the scheduled leader for this trip. Exact date and other details to be announced. Check the field trip page at [roguevalleyaudubon.org](http://roguevalleyaudubon.org).

## FIRST WEDNESDAY BIRD WALKS CONTINUE AT AGATE LAKE

Murray Orr will continue to lead his monthly bird walks on the first Wednesday of each month at Agate Lake. Birders wishing to join Murray should meet him on the far side of the lake across from the boat dock to observe birds on and near Agate Lake. The walk begins at 8:30 and will end before noon. Meet Murray at the gate. We hope you can join us. Contact Murray at 547-857-9050.

## STEPPING UP

Would I be a board member? Never had it occurred to me. However, being an eldest child and a tad neurotic, of course I had to at least consider it. Do you remember being told to be "Sensible, logical, responsible, practical"?\* The eldest child is the only one listening when the parent makes these statements. Doesn't mean they will be sensible etc. but they did hear the parental voice. They take that voice with them. So, back to the matter at hand. All the years I have been in Audubon, I haven't stepped up to do very much. It is about time I thought. So I said yes. To my surprise, I am really enjoying my time as a board member. I have met some very interesting people. I have been places and done things that I wouldn't have were I not a board member. It has expanded my horizons. The work is not onerous. It is something you are interested in anyway. So when Audubon needs a board member, or a committee chair, I hope you will give it a try.

Carol Palmer

### Sign up to receive easy notification of Chapter activities

Your Audubon Chapter wants to be sure you are aware of upcoming field trips, chapter meetings, the most recent edition of *The Chat*, and other items we post on-line. Send an e-mail [RogueValleyAudubon@gmail.com](mailto:RogueValleyAudubon@gmail.com) and ask to be added to the e-mail notification list. And be assured, we will never share your e-mail address with any other organizations.
